

FEC RAILROAD TRANSPORTATION BUILDING

Barron Development Corporation was founded in 1988 and is family owned and operated. We are a State Certified General Contractor that specializes in high end luxury waterfront homes, large and small scale renovations, commercial build outs, multi-story and specialty commercial projects. When R.T. Milord presented us an opportunity to be part of their team and assist in the development of the intermodal transportation facility at Port Everglades, we were honored. Barron Development Corporation worked hand in hand with R.T. Milord and built the transportation and maintenance buildings while R.T. Milord focused on the primary development of the entire site and infrastructure system. Working together with R.T. Milord was a great partnership and allowed this project to come in on schedule. We at Barron Development Corporation are looking forward to the opportunity to be a part of their team on the next project.
